DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11, 18-31 and 38-40 rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly (US 5,032,312).

The reference discloses novel compounds represented by formula I, which include the present formulae (I-1) and (I-2). See the compounds of col. 23, lines 45-68. The reference further teaches the 0.1-100 wt.% can be used in liquid crystal mixture (see col. 14, lines 17-29). The reference mixtures containing the suitable compounds of the formulae (col. 14 to col. 15) encompass the present formulae (2)-(4), which are useful for nematic display device. See the reference claims 18-23.

The reference differs from the claims in that the claimed composition has a negative dielectric anisotropy. It is known that the reference compounds 2,3-difluorobenzene with an allyl ether (col. 23, lines 45-68) have negative dielectric anisotropy (see CAPLUS 1991: 571442). Therefore, it would have been obvious to those skilled in the art to use negative dielectric anisotropy of the reference compounds (compounds 2,3-difluorobenzene with an allyl ether) to admix with other suitable

compounds (formulae XX-XXII and XIV-XXXI on col. 14 to col. 15) to arrive at the claimed invention.

Allowable Subject Matter

3. Claims 12-17 and 32-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9:30 AM to 6:00 PM.
